Calibration with strategy none: pilot-v4, mean over 10 seeds per cell
(a) P1: stress prevalence and displacements per household (shaded targets)
stress prevalence, quarters 1 to 4
stress prevalence, quarter 40
displacements per household at quarter 40
share of households
bg-target-move-prob (top), termination-hazard-base (bottom)
(b) P2: forced-move share (target 0.20 to 0.35)
